Answer Options	Responses	Percentage
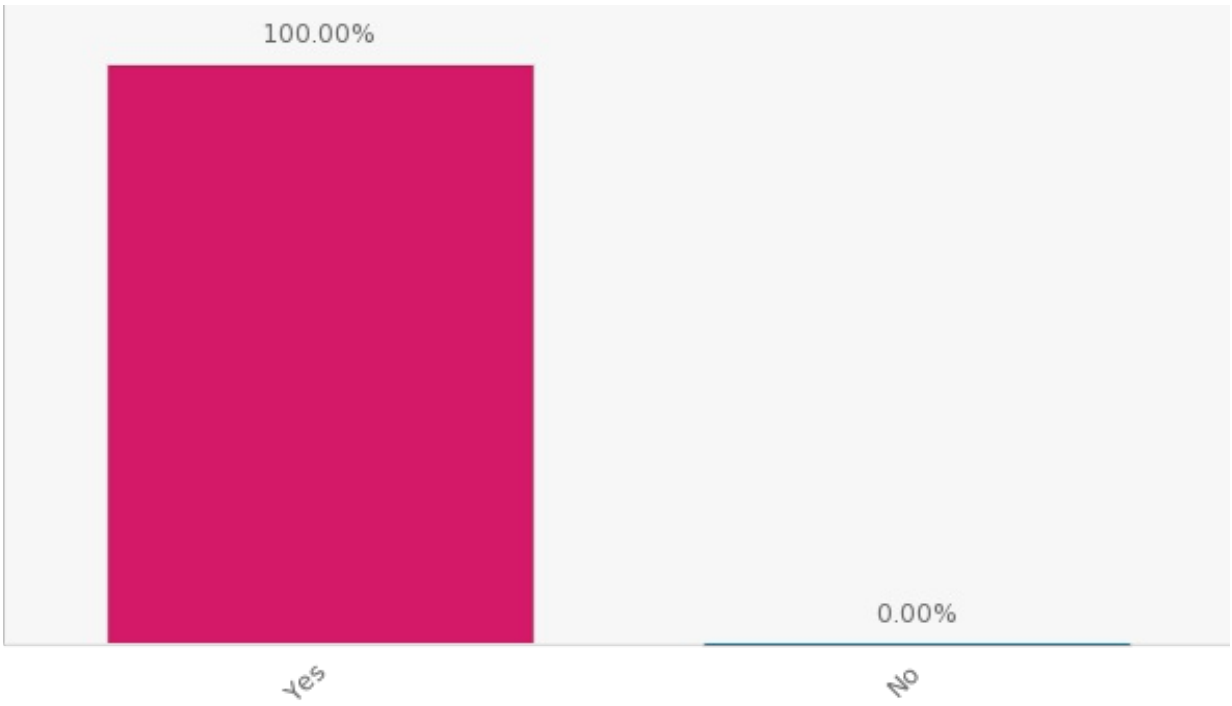
Strongly Agree	14	70.00%
Agree	6	30.00%
Neutral	0	0.00%
Disagree	0	0.00%
Strongly Disagree	0	0.00%
Total	**20**	**100.00%**

Q. Would you recommend this session to a colleague?

Top Response Options



Answer Options	Responses	Percentage
Yes	21	100.00%
No	0	0.00%
Total	**21**	**100.00%**

Q. Please provide general comments about the session and how it might be improved.

Email	Responses
Anonymous	The presence of biomechanical studies would be highly beneficial in helping the surgeons in understanding the mechanical principles behind spine instrumentation, as well as in supporting them in the decision making process.
Anonymous	It would be highly valueable to include biomechanical studies. As an engineer, the diversiry of the presented works implied the lack of having engineering knwoledges, specially to address the debate on how different correction approaches change the outcome.
Anonymous	Exercise
Anonymous	Great end to the meeting
